xGnP® Graphene Nanoplatelets – Grade H properties

Other properties

Supplier data

SI units

Imperial units

Properties	Value & unit	Test condition	Test method
Carbon content (parallel to surface, perpendicular to surface)	> 99.5 %		
Density	2.2 g/cm ³	parallel to surface, perpendicular to surface	
Electrical Conductivity	10 ⁷ S/m		
Electrical Conductivity	10 ² S/m		
Tensile Modulus, MD	1000 GPa	parallel to surface	
Tensile Strength, MD	5 GPa	parallel to surface	
Thermal conductivity (parallel to surface)	3000 watts/meter-K		
Thermal conductivity (perpendicular to surface)	6 watts/meter-K
